---

To whoever it may concern,

I am currently studying to get my Bachelor's Degree of Information Technology with a specialization in Web & App Development, and Cyber Security, from Macquarie University. I am very excited to bring my expertise, skills, and dedication to your company's dynamic environment.

Throughout my academic journey thus far, I have received immense technical knowledge and know that this program can help me to further develop my expertise and skills. Here's what I can offer -

- Proficient in a range of programming languages - HTML, CSS, JavaScript, Java, Python and SQL.
- Founded and currently run my own online business that has taught me about responsibility, consistency, hard-working, perseverance, and problem-solving.
- This business has also allowed me to work well with customers, to make sure their experience with my business is the best that I can provide.
- I have a deep love for the IT space, and love learning all that I can that will help me improve, grow and become a valued asset to any company that I am apart of.

I am very passionate about all that I do, and I know that I can bring that into any organization that I will work with. Hope to hear from you soon!

Sincerely,  
Joshua Defredes

- Access

## Work Experience

### Bargainz R Oz

Successfully started and operate my own online store. This business venture has allowed me to support myself through university, without needing any financial aid from my parents. This online store, boasting a 100% customer satisfaction rating, has taught me a lot about responsibility, consistency , creative thinking, and overall working to the best of my abilities in all projects I undertake. I plan to bring all these values and attributes to any work environment that I am apart of, proving myself as an invaluable asset to any team.
